## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because it is longer than 150 words. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They are replete with grammatical and idiomatic errors. Claims must begin with a capital letter and end with a period and nowhere else should periods be used. The used of quotation marks are not acceptable in the claim. Each and every structure needs to be positively recited. Indefinite or unclear language should not be in a claim; a few example are "so designed and fabricated so as" in line 1 of claim 1; "but" in line 3 of claim 1; "of convenient" in line 5 of claim 1; "its" in line 9 of claim 1; "thus being" in line 9 of claim 1; "which" in line 10 of claim 1; "being so ideally placed" in line 16 of claim 1; "its component parts" in line 1 of claim 4; "would have the ability to act" in line 2 of claim 4; "to be ultimately" in line 6 of claim 4; "being of a convenient size and design" in line 10 of claim 4; "etc." and "i.e." are not acceptable in the claim; and "such as" is also an indefinite language. Appropriate correction is required. Applicant may

refer to the patents cited by the examiner as an example of how claims are properly written. Due to the replete of errors in the claims, it is unclear as to the scope of the claim. For the purpose of this examination, the examiner considers the claims as best understood.

4. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Reents or Stern et al.
